# Journal of Bioinformatics and Computational Biology

## Guidelines for Contributors

Submission of a manuscript indicates a tacit understanding that the paper is not under consideration for publication with other journals. All contributions should be written in English with a brief abstract, a list of keywords and the author's mailing address. Authors are requested to put on the manuscript the mailing address to which proofs and reprint order form should be sent.

Upon acceptance of an article, the author(s) are assumed to have transferred the copyright of the article to the publisher. This transfer will ensure the widest possible dissemination of information. A biographical sketch and photograph of each author are also to be supplied to the Publisher.

Detailed instructions on how to prepare your manuscript are available at readme / Download. The downloaded package contains stylefiles for **Latex2e**. Authors using PC- or Mac-based word-processors should follow the PDF formatting instructions in the package. Any manuscript which does not conform to the above instructions may be returned to authors for revision before publication. Upon acceptance, authors are required to submit their source file including ps or eps files for figures.

The corresponding author of every published article will be provided with a complimentary PDF of the published paper.

## Recommended Article Length

| Category | Free Reformatted Page |
|---|---|
| Research Paper | 15 |
| ~~Critical Comments~~ | ~~10~~ |
| ~~Survey / Reviews~~ | ~~15~~ |
| ~~Tutorial Papers~~ | ~~30~~ |

Please note that **US$40 per reformatted page** will be charged for any article exceeding the recommended length.

## Illustrations and Images

Please prepare all line drawings, halftones (gray scale) and color illustrations in high resolution.

The Requirements

1. 600 dpi for line drawings (black and white).

2. 300 dpi for halftones (gray scale). Do not convert from color images as they reproduce very poorly.
3. 300 dpi for color images. Must be in CMYK (Cyan, Magenta, Yellow and Black) for color separation. RGB (Red, Green and Blue) is unacceptable for color separation work. Color images to be printed in color are allowed only as agreed in the contract.
4. Ensure all labels/annotations are sharp and clear for reproduction. Easy-to-read typeface/font like Arial, Helvetica or Times Roman are recommended for the labels.
5. To provide softcopy of the illustrations in either eps, ps, tif, jpg, gif or bmp format, preferable on a PC platform. All illustrations should be embedded in the text. At the same time provide the illustration, example, John_fig1.eps, Hogn_fig2.eps, or John_fig1.tif, John_fig2.tif.
6. If soft copies are not available, authors are requested to submit good original glossy prints for clear reproduction. Figure number must be clearly labeled on the back and preferably indicate which side of the figure is the top by using an arrow pointing upwards.

## Color Charge

Contributors have to pay the following additional cost:

- US$200 for each color illustration
- An additional US$100 for Color Supporting Information that must be scanned

A single figure is defined as original art that can be processed as a unit and printed on one page without intervening type.

Contributors can also opt to have the electronic version in color while the print version in black and white. No color charge will be incurred in this case.

Billing address and contact numbers, together with the manuscripts, should be provided during submission. Please indicate illustrations that are designated for color print.

## Detailed instructions for preparation of manuscripts are available at:

- **Latex-2e** (readme / Download)
- **MS-Word (ZIP files)** (readme / Download)
